

Eyelid Conditions

The eyelid is a thin fold of skin that covers and protects the eye.

"Palpebral" (and "blepharal") means relating to the eyelids.

The human eyelid features a row of eyelashes that serve to heighten the protection of the eye from dust and foreign debris, as well as from perspiration. Its key function is to regularly spread the tears and other secretions on the eye surface to keep

it moist, since the cornea must be continuously moist. They keep the eyes from drying out when asleep. Moreover, the blink reflex protects the eye from foreign bodies.

Eyelid surgeries are overall safe procedures but they carry certain risks since the area on which the operation is performed is so close to the eye.

What are the common eyelid conditions?

All conditions that affect the eyelid are called eyelid conditions. The most common eyelid conditions where you could use a product like Ilast Care are the following:

- **Blepharitis:** inflammation of the eyelids
- **Eyelid dermatitis:** inflammation of the eyelid skin, dry flaky skin
- **Eczema:** sore dry eyelids
- **Atopic dermatitis:** inflammatory, non contagious, itchy skin disorder
- **Xerosis:** severe dry and flaky eyelids

What is the treatment for an eyelid conditions?

If you feel you are suffering from any of the above conditions you should contact your local optometrist or your GP who will advise on the appropriate treatment.

Ilast Care

Cream to soothe irritated eyelids

- **Preservative Free**
- **Alcohol Free**
- **Fragrance Free**
- **Essential Oils Free**
- **3 in one action:**
Soothes, Moisturises and
Protects

Ilast Care is a cream designed to soothe and treat diseased eyelids such as in atopic (allergic) dermatitis, eczema and xerosis (severe dry and flaky eyelids).

Ilast Care helps to relieve irritation and skin dryness. It can also be used in cases of blepharitis once the eyelid/eyelash debris has been removed.

Ilast Care is to be used morning and evening as part of your daily eyelid hygiene routine.

It is preservative free and also contains no alcohol, parabens, lanolin, fragrances or essential oils.

Ilast Care is a registered medical device and is presented in a 30ml airless pump dispenser bottle.

How to use

Turn the head of the bottle anti-clockwise (see the arrow on the pump) holding the body of the bottle with the other hand. This unlocks the pump.

During first use: press several times on the head of the bottle to prime the pump.

Apply morning and evening in regular thin layers around the eye contours massaging gently in circular movements.

Lock the pump after use: by turning the head of the bottle clockwise.

Once opened the bottle lasts for 90 days.

Ilast Care contains

0.5% Hyaluronic acid which will help with moisturisation, protection and to encourage healing of the effected eyelids.

Vitamin A maintains hydration, skin protection and also promotes healing.

Allantoin 0.2% is known to soothe the eyelid and helps to encourage the skin to heal.
