

# Keradrop® factsheet

Keradrop® is an eye drop containing 2.5 % Glycyrrhizin which is a natural anti-inflammatory derived from the licorice root.

Keradrop® should be used in persistent cases of dry eye where ocular surface inflammation is suspected.

Keradrop® is preservative free on the eye and lasts for 60 days from opening.

Keradrop® is presented in a 5ml container.

## How to use

Instill one or two drops into the affected eye(s) twice a day or more according to medical advice.

To avoid any contamination ensure the tip of the bottle does not come into contact with the eye.

To avoid any contamination ensure the tip of the bottle doesn't come into contact with the eye.

Suspend treatment with Keradrop if there is any hypersensitivity to any of the ingredients

**If symptoms persist seek medical advice from your doctor or optometrist.**
